

Today security and safety are two very important terms. We all want that ourselves, our family, our homes, our cars and everything around us to be safe. Our computers are also things that we want to keep safe. If for homes and cars we have alarms, for computers we have antivirus. The antivirus market is very wide, giving us the possibility to choose.

Even though we have that opportunity, the problem is how to choose? How do we know which is the best antivirus?

In order to find the answer to this question we ask our friends and colleagues, we ask the man from the store, we ask "the boy who knows about computers", we read reviews and forums. We will have the surprise to get different answers. You might find yourself more confused than at the beginning.

We can find many products of this kind on the market and we all know that a product with high notoriety is it more likely to be good. From the top of most known and used antivirus we can mention BitDefender Antivirus 2011, Norton Antivirus 2011, 3 F-Secure Antivirus 2011, 4 ESET Nod32 Antivirus 4, TrendMicro Titanium Antivirus, Kaspersky Antivirus 2011, Zonealarm Antivirus 2011, AVG Antivirus 2011, McAfee Antivirus 2011 and CA Antivirus 2011.

You can buy these programs in specialized stores and on the Internet. The prices vary depending of the complexity, the number of computers it can be installed, the scanning speed, the level of protection, how often it updates the viruses database etc. For the majority of these software we can find trial versions on the Internet that can be downloaded, installed in the computer and used for free for a certain period of time.

The main feature of this kind of software is to keep your computer safe from viruses, spyware, trojans and other forms of malware that threatens it daily.

Even though a program is very known and very appreciated it is possible not to be the best choice for you. Some applications are designed especially for firms and would not be a good solution for a person who needs it for his home notebook.

The best way of finding out which is the best antivirus for you is to try them. Use the trial version of several software and see whose interface is more friendly, which is more easy to use, which keeps your information and you computer safer and you will find out which is better for you.

The expression" best antivirus" is relative. The one that for some is the best can be almost useful for others so, we got to the conclusion that the best antivirus is that which satisfies your needs best.
